

Santosh Tambe

Software Engineer | AI Engineer | Python, LLM, RAG | Pune
tambesantosh9420032829@gmail.com | +91-8767380833 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI-focused Software Engineer with hands-on experience building full-stack and Generative AI applications using Python, Flask, and FastAPI. Skilled in RAG pipelines, LLM integration (OpenAI, Gemini), and agentic workflows with LangChain/LangGraph. Proven ability to ship features that cut manual effort and improve user experience across multiple production-style projects.

EDUCATION

Rajendra Mane College of Engineering and Technology, University of Mumbai, India 2022 – 2026
B.E. in Computer Engineering — CGPI: 7.35

SKILLS SUMMARY

- **Languages:** Python, JavaScript, SQL, HTML, CSS, React JS*, Node JS*
- **AI & Automation:** OpenAI API, Google Gemini API, Multimodal AI, RAG, LLM, Prompt Engineering, LangChain, LangGraph, MCP, n8n
- **Frameworks & Tools:** Flask, Bootstrap, REST APIs, Git, GitHub, VS Code, Figma
- **Databases:** MySQL, ChromaDB (Vector Database)
- **Soft Skills:** Leadership, Event Management, Writing, Time Management

EXPERIENCE

Software Engineer Intern — Reunyte Services Feb 2024 – May 2026

- Engineered 3+ AI-powered and full-stack web applications using Python, Flask, JavaScript, HTML, CSS, and MySQL
- Shipped 5+ Generative AI features using Google Gemini and OpenAI APIs, cutting manual effort by 60%
- Built 20+ responsive UI/UX prototypes using Figma, Canva, Bootstrap, and JavaScript, improving user experience metrics

PROJECTS

Python Autonomous AI Agent | Python Autonomous AI Agent | Python, FastAPI, Multimodal AI, OpenAI API, Google Gemini API, LangGraph, LangChain, Docker | [GitHub](#)

- Developed an autonomous multimodal AI agent that executes complex multi-step tasks using OpenAI and Google Gemini APIs
- Integrated LangGraph, LangChain, memory, and tool calling to build intelligent agentic workflows with multimodal capabilities
- Built production-ready FastAPI services and automated **.docx** report generation using Docker

AI Document Question Answering Chatbot | AI Document Question Answering Chatbot | Python, FastAPI, React, Multimodal RAG, OpenAI API, Google Gemini API, LangChain, ChromaDB (Vector Database) | [GitHub](#)

- Built a RAG-based chatbot to answer questions from uploaded PDF documents
- Implemented document parsing, embeddings, and semantic retrieval using ChromaDB and LangChain
- Enhanced FastAPI backend APIs with an interactive React interface

House Price Prediction System | Python, Scikit-learn, Pandas, NumPy, Streamlit | [GitHub](#)

- Developed a machine learning model to predict housing prices using California housing data
- Improved accuracy through data preprocessing, feature engineering, and model evaluation
- Built a Streamlit application for real-time price prediction and visualization

ACTIVITIES AND ACHIEVEMENTS

Docs Management & Driver @tft_racing — Team Full Throttle (National Level Go-Kart Racing Team)

Nov 2023 – May 2026

- Led technical documentation and design reporting for a 20+ member Formula Student-style engineering team
- Coordinated design, manufacturing, and testing teams to improve project workflow
- Participation Certificates: GKDC Season 11 (2024) | GKDC Season 12 (2025) | GKDC Season 13 (2026)

TCS iON National Qualifier Test (NQT) – IT

May 2026

- Overall Score 60.11%, Quantitative & Reasoning 86.85%, Programming: Python

NxtWave CCBP 4.0 Academy

- Generative AI, Python Programming, SQL, JavaScript, Responsive Web Development, Node.js*, React JS*, DSA
